

No One Is Forgotten: An Immersive Opera has been designed specifically with Immersive Audio in mind, also known as Dolby Atmos. There are no visuals.

We built the world with immersive technology, using composition, spoken word, music, foley and sound design.

On your first listen, we recommend listening from beginning to end, in order. Get comfortable, grab your favorite beverage or snack, and relax.

Unlike stereo, you will be immersed in a three dimensional listening environment that places you in the center of the action.

While it is available in standard stereo, we recommend you experience it in Dolby Atmos.

THERE ARE MULTIPLE WAYS TO ACCESS THE OPERA

You can purchase the immersive opera on <https://immersiveaudioalbum.com/>, or you can listen to it in Dolby Atmos on Apple Music, Apple Classical or Tidal, with a subscription.

Our interactive digital booklet has detailed information about the opera along with bonus interviews from our creatives and cast. The booklet and videos are included in any direct download purchase on www.immersiveaudioalbum.com

The digital booklet and bonus videos can be purchased separately on our website, <https://www.nooneisforgottenopera.com/>

HOW TO DOWNLOAD AND LISTEN TO THE ALBUM

Go to <https://immersiveaudioalbum.com/>

Click on the MP4 option and purchase. The MP4 file will allow you to listen to the album on your headphones. After your purchase, you will receive a code from the website and instructions on how to download.

Once downloaded, Double click on the zip file to unzip.

You will see the interactive guide in pdf format, a folder containing videos and special content, and a folder containing the entire opera in 38 tracks.

Open your media player on a computer, (your media player is what you use to play audio and video files).

The VLC media player, which can be used on both Mac or PC, can be downloaded for free at the link below. (videolan.org)

For Mac users you can use Apple Music,
But we recommend VLC media player for PC users.

FOR PC USERS

Open VLC media player

In a separate window, open the folder containing all of the audio files that you've just downloaded.

Select them in order and drag them into the player window.

You'll see the titles and credits appear.

Put on your headphones, and you are ready to listen to the opera!

FOR MAC USERS

Use the VLC media player or open Apple Music.

Create a new playlist.

To create a new playlist select 'Command N'.

You'll see a blank playlist appear, ready to be named.

Type in No One Is Forgotten and press enter.

You have now named your playlist.

Return to the folder with the downloaded audio files.

Highlight all 38 audio files.

And drag and drop them into your new playlist.

Put on your headphones, and you are ready to listen to the opera!

We are so excited to deliver No One Is Forgotten to your ears, and your imaginations.
